

Your guide to easy access bathing solutions

A practical first step towards safer, more comfortable independent living

Why consider an accessible bathroom?

For many people, the bathroom is the first room in the home that starts to feel difficult.

It may be stepping over the side of a bath, feeling unsteady on wet floors, struggling to lower yourself onto the toilet, or worrying about slipping when alone.

Sometimes this change happens gradually with age. Sometimes it follows illness, surgery, or a medical condition.

Adapting your bathroom is not about giving up independence. It is about protecting it.

A well-designed accessible bathroom can:

- ✓ Reduce the risk of falls
- ✓ Make washing easier and less tiring
- ✓ Provide comfort and dignity
- ✓ Allow you to remain in your own home for longer

Understand your needs

Before choosing the right bathroom solution, it is important to understand your personal situation. So ask yourself the following questions:

1 What is difficult right now?

- Getting in and out of the bath?
- Standing for long periods?
- Balance issues?
- Fear of falling?

2 Is your mobility likely to change?

If you have a progressive condition, it is wise to plan ahead.

3 Do you use walking aids or a wheelchair?

Clear space and layout become important.

4 Do you have carers visiting?

They may need space to assist safely.

There is no single right solution. The right solution is the one that suits you.

If you are unsure, please feel free to call, or book a visit and we will help you.

Our opening hours are:

Mon - Fri: 9:00 - 19:00

Sat - Sun: 10:00 - 16:00

Walk-in baths

A walk-in bath allows you to step through a watertight door rather than climbing over the side.

They are ideal for those who still enjoy soaking in a bath but need safer access.

Things to consider:

You enter and sit before filling the bath, and you remain seated while it drains. Adequate water pressure is important for fast filling, but we can assess that for you.

Walk-in baths provide comfort and familiarity while significantly improving safety.

Key features include:

- ✓ Low threshold door
- ✓ Built-in seat
- ✓ Anti-slip base
- ✓ Optional shower attachment
- ✓ Fast-fill and quick-drain systems
- ✓ Pain relief for some people

What our customers say:

Customers love being able to enjoy a relaxing soak again without the barrier of stepping over a high bath. The secure seating and easy-access door provide comfort, confidence and independence, all while keeping the familiarity of a traditional bath.

Easy access walk-in showers

Walk-in showers are one of the most popular choices for accessible bathrooms.

They are ideal for those who prefer showering, find sitting in a bath difficult, or want a modern, open appearance.

For many customers, a walk-in shower feels like the simplest and safest solution.

Benefits include:

- ✓ Very low or level entry
- ✓ Slip-resistant flooring
- ✓ Fold-down seats available
- ✓ Grab rails positioned where needed
- ✓ Thermostatic controls to prevent scalding

What our customers say:

One of the most common reactions we hear is how modern and "normal" their walk-in shower feels once it's installed. What they initially imagined as something clinical or purely functional turns out to look just like a stylish, modern bathroom – just safer and more practical.

Wet rooms & specialist adaptations

A wet room is a fully waterproofed bathroom with a level-access shower area.

They are particularly suitable for wheelchair users, those needing carer assistance, or homeowners wanting to future-proof their property.

Wet rooms require careful planning and professional waterproofing to ensure long-term reliability. But worry not as we sort all of that out for you.

Advantages include:

- ✓ Completely step-free access
- ✓ Spacious and flexible layout
- ✓ Easy to clean surfaces
- ✓ Modern appearance

What our customers say:

Many customers tell us that their wet room has completely transformed how they use their bathroom. In smaller bathrooms especially, removing bulky trays, raised edges and fixed enclosures helps declutter the space. With reduced screens and fixtures, the room feels noticeably more open, spacious and often much bigger than it did before.

Important safety features & accessories

Small details often make the biggest difference in daily comfort and safety.

Consider the following:

- 1 Grab rails positioned correctly
- 2 Raised height toilets
- 3 Non-slip flooring
- 4 Wall-mounted or fold-down shower seats
- 5 Lever taps instead of twist taps
- 6 Easy-reach storage
- 7 Improved lighting

Together these changes can bring back the pleasure of bathing to those who see it as a distant memory.

Visiting a showroom: why it matters

While photos online are helpful, standing inside a display bathroom gives a completely different perspective.

When you visit a specialist showroom you can:

- ✓ Step into a walk-in bath
- ✓ Sit on a shower seat
- ✓ See floor levels clearly
- ✓ Test different features
- ✓ Feel the quality of the materials
- ✓ Ask questions in person

 Life Quality Bathing

At Life Quality Bathing, we have one of the largest displays in the UK, all laid out in front of you to help you find the solution that works best.

Our customers are encouraged to take their time, bring family members, and explore options without pressure.

Where to start

You do not need to have all the answers before making contact.

A simple conversation can help clarify:

- What may suit your space
- What may suit your mobility
- What your budget allows
- What changes would make daily life easier

Whether you visit the showroom, book a home consultation, or simply call for advice, the aim is not to sell you something unnecessary.

The aim is to help you make an informed decision.

About Life Quality Bathing

Life Quality Bathing's main aim is to help you find the right bathing solution for your individual needs – there will never be any pressure to purchase.

With excellent customer reviews and high star ratings, we are members of Checkatrade, a Which? Trusted Trader and proud members of The Guild of Craftsmen.

Our sole aim is to help you decide which system works best for you in your home, through our expert guidance.

If you can't make it to our showroom, we'll visit you in your own home for a personal consultation and bathroom survey.

At Life Quality Bathing we design the perfect layout for your space and personal requirements. We also manage the complete installation process, allowing you to relax knowing you're in safe hands from the initial visit through to design and installation.

All our work and products come fully guaranteed, giving you complete peace of mind with your investment.
